MECTRON

Sestri Levante, Italy

12. – 14.06.2025

→ SPEAKERS

Prof. Tomaso Vercellotti

Adjunct Professor at University Genoa and Turin
Inventor of Piezosurgery, Founder
of International Piezoelectric Academy IPA

Dr Riccardo Kraus

Private practice, Lugano
Senior Lecturer, Clinic for Reconstructive
Dentistry, University of Zurich

Dr Barbara Carollo

Private practice, Wohlhusen / Grosswangen
President of Swiss Society of Periodontology SSP

PD Dr Norbert Cionca

Private practice, Geneva
Head of Periodontology Specialty Program,
Division of Regenerative Dentistry and Peri-
odontology, University of Geneva

→ THURSDAY
JUNE 12, 2025, 19:00
**Welcome, get-together
and joint sundowner**
Venue: Hotel Helvetia,
Terrazza Quintopiano
Via Cappuccini 43,
16039 Sestri Levante (GE)

FRIDAY, JUNE 13, 2025

PIEZOSURGERY-DAY

- 9:00 to 10:30** Advantages of piezoelectric microsurgical technique in daily practice – part 1
Prof. Tomaso Vercellotti
- 10:30** Coffee break
- 11:00 to 13:00** Advantages of piezoelectric microsurgical technique in daily practice – part 2
Prof. Tomaso Vercellotti
- 13:00** Lunch break
- 14:00 to 15:00** Digital technologies meet piezoelectric surgery
Dr Riccardo Kraus
- 15:00 to 17:30** Hands-on and wrap-up
- 20:00** Joint dinner
- Dinner for all participants and the speakers
Hôtel Vis à Vis (terrasse Giunone),
Via della Chiusa, 28, 16039 Sestri Levante GE

SATURDAY, JUNE 14, 2025

PERIO-DAY

- 9:00 to 10:30** Periodontitis management with a simple and cost-effective periodontal treatment – part 1
Dr Barbara Carollo
- 10:30** Coffee break
- 11:00 to 13:00** Periodontitis management with a simple and cost-effective periodontal treatment – part 2
PD Dr Norbert Cionca
- 13:00** Lunch break
- 14:00 to 15:30** Hands-on and wrap-up

PROF. TOMASO VERCELLOTTI

The course organisation allows the participants to obtain a wide overview on clinical advantages of piezoelectric surgery in daily practice. The topics, introduced in a monographic way, enable the attendees to assimilate a summary of Piezosurgery's inventor activity developed over the years and, more specifically, allow them to evaluate the surgical protocol, step by step, of the following techniques:

- Dental and third molar Piezosurgery extraction technique
- Ultrasonic implant site preparation: advantages and limits
- Lateral and transcrestal sinus lift technique
- Corticotomy for surgical guided orthodontics in adult patients

Considering that this is a 'peer to peer' meeting, the speaker will be happy to provide ample space for 'questions and answers'.

DR RICCARDO KRAUS

The integration of digital technologies with piezoelectric surgery offers new approaches to oral surgery. From extractions to bone augmentation, apical surgeries, and sinus floor elevation, this lecture will explore how digital imaging, 3D planning, and real-time navigation enhance the precision and efficiency of piezoelectric devices, enabling minimally invasive procedures.

DR BARBARA CAROLLO / PD DR NORBERT CIONCA

Periodontitis prevalence has increased over the last years. The consequences of this disease are not only related to the loss of attachment or of a tooth, but they also impact our patients' quality of life.

Protocols were implemented to treat as minimally invasive as possible this disease. The preference is always to start with a non-surgical approach which, however, may not be sufficient to achieve satisfactory results. Periodontal surgery has many faces and plays the role of additional therapy in particular sites such as vertical defects, furcation damage, residual pockets or muco-gingival problems.

The aim of this presentation is to review the therapeutic arsenal available, with its indications and limitations.
